What's going on this week?

Brazil's indigenous people came together at COP26 earlier this month to share their message, that the world needs their expertise in protecting the Amazon rainforest. They have said they face increasing threats from loggers and miners. Their way of life is being threatened and huge areas of forest are being destroyed. It's thought that indigenous leaders in Latin America and the Caribbean protect around an eighth of all the carbon stored by tropical rainforests across the world.

Things to talk about at home...

- 🧐 How can the land indigenous groups live on be protected? Whose job do you think it is?
- 🧐 What types of things do you think help make a 'natural life'? Do you think it's important for us to make our lives as natural as we can?
